DETAILED ACTION

Election/Restrictions

1. Claims 17-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species B, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/11/05.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 7/13/05 has been considered by the examiner.

Claim Objections

3. Claims 6-9 are objected to because of the following informalities: Claim 6, line 11, "form" appears to be a typo and should read "from". Claim 7, line 7, "batter" appears to be a typo and should read "battery". Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hara et al. (US 5,713,814 A).

Hara et al. discloses a hybrid vehicle comprising an engine 1, motor/generator 5, battery 7, traction wheels 19, planetary gear system 4 inherently with sun gear, ring gear, planetary carrier, and input and output elements, and a controller 10, wherein said controller has a power-split mode where said engine drives said wheels and said generator (parallel), a motor-only mode where said motor drives said traction wheels, and a combined mode (series) where both drive said wheels depending upon driver power demand, vehicle speed, and power efficiency based on a SOC of the battery and said controller has predetermined maximum and minimum limits and based on a requested power amount, the controller makes adjustments to prevent unnecessary battery usage, shown in figures 1-16 and recited in the abstract.
